

STATEMENT OF PURPOSE

RS19216

Under Idaho law the State Board of Education has authority to delegate administrative and management responsibilities to its chief executive officers. However, certain Board duties expressly conferred to the Board and involving judgment and discretion cannot be further delegated without express legislative authority.

The purpose of this legislation is to amend Board powers with respect to delegation of authority, permitting the Board to delegate to its chief executive officers' any specific express duties the Board has under the laws of the State, that may be more efficiently carried out by one of its agencies or institutions.

FISCAL NOTE

There would be no fiscal impact as a result of this legislation.
